

DEEP NEMA

Banswara, India · deepnema7@gmail.com · +91 83026 92414 · [LinkedIn](#) · [GitHub](#)

Professional Summary

B.Tech Computer Science graduate with experience in AI/ML application development, software engineering, and product-based solutions. Skilled in Python, Java, machine learning, NLP, LLMs, REST API development, and database systems. Experienced in designing, developing, testing, and optimizing software modules through AI-driven projects and internships. Strong foundation in data structures, algorithms, debugging, and building scalable technology solutions following software development practices.

Education

Vellore Institute of Technology, Bhopal

2022 – Present

B.Tech — Computer Science (Health Informatics)

Core Skills

Languages	Java, Python, SQL, JavaScript
AI & Machine Learning	Machine Learning, Deep Learning, NLP, LLMs, RAG, Prompt Engineering
Software Development	Data Structures & Algorithms, OOP, REST APIs, FastAPI, Software Design, Debugging, Unit Testing
Database & Cloud	MySQL, PostgreSQL, BigQuery, Google Cloud Platform, AWS Basics
Tools	Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Jira
Professional Skills	Problem Solving, Analytical Thinking, Team Collaboration, Adaptability

Work Experience

AI/ML Computational Science Intern – Saiket Systems

Oct 2025 – Apr 2026

- Developed an AI-powered Converser Tool using Python, SQL, Google Gemini LLM, and NLP techniques to generate optimized database queries from natural language inputs.
- Implemented prompt engineering, embeddings-based semantic search, and AI workflows to improve query accuracy, response generation, and system performance.
- Designed, tested, and optimized software modules while debugging issues and collaborating with teams to enhance product functionality.

Skills: Python | SQL | Machine Learning | NLP | LLMs | Prompt Engineering | Software Development | Debugging

Projects

DocuMindAI – Intelligent Document AI System

[GitHub](#)

- Developed a RAG-based AI application using Python, FAISS, embeddings, and LLMs for document understanding and intelligent question answering.
- Implemented NLP pipelines with semantic search and context retrieval while designing scalable AI software components.

MarketPulseAI – Real-Time Market Intelligence Platform

[GitHub](#)

- Developed a backend application using Python, FastAPI, REST APIs, and PostgreSQL for real-time market data processing.
- Designed reusable modules, implemented APIs, and performed debugging and optimization following software development practices.

Brain Tumor Detection using Deep Learning

[GitHub](#)

- Built a CNN-based deep learning model using Python and TensorFlow/Keras to classify brain tumor MRI images with 95% accuracy.
- Applied preprocessing, model training, testing, and evaluation techniques to improve prediction reliability.

Certifications

- IBM – Generative AI using Watsonx.ai
- Oracle – Java SE 11 Developer Professional
- Google Cloud Skills Boost – BigQuery and Cloud Data Analytics
